Product Description

Is 304 or 316 stainless steel stronger?

There is little difference between alloys when it comes to strength, but corrosion resistance is where the 316 truly surpasses the 304.

Products Description

PRODUCT DETAIL

High corrosion resistance makes it usable in harsh environments. It is fire and heat resistant, resists scaling and maintains strength at high temperatures.

Aesthetically pleasing appearance provides a modern and attractive appearance for most architectural metal applications

The non-porous surface coupled with the easy cleaning ability of stainless steel makes it the first choice for applications requiring strict hygiene controls, such as hospitals, kitchens and other food processing plants.

Using modern steelmaking technology, stainless steel can be cut, machined, fabricated, welded and formed like traditional steel, so it is easy to manufacture
